

SHOWRUP DAS

Computer Science Undergraduate · Web Development & Software Engineering · Machine Learning
01316788954 • showrupd@gmail.com • [LinkedIn](#) • [GitHub](#) • [LeetCode](#)

PROFILE

Enthusiastic Computer Science undergraduate with a strong interest in web development, software engineering, and system design. Experienced in developing web applications, deep learning models, and federated learning systems through academic and personal projects. Passionate about solving challenging problems, learning new technologies, and building scalable software solutions.

EDUCATION

Premier University Chattogram <i>Bachelor of Science in Computer Science & Engineering · GPA: 3.92</i>	2022 – Present
Bakolia Government College Chattogram <i>Higher Secondary Certificate (HSC) · GPA: 5.00</i>	2018 – 2020
Bakolia Government High School Chattogram <i>Secondary School Certificate (SSC) · GPA: 5.00</i>	2012 – 2018

PROJECTS

[Railway Management System](#) — PHP, Laravel, MySQL, JavaScript

- Developed a web-based railway reservation system featuring user authentication, train scheduling, ticket booking, passenger management, and database-driven CRUD operations.

[RNN-Based Depression Detection](#) — Python, TensorFlow, Keras, NLP

- Built an NLP-based deep learning pipeline for detecting depression severity in Bangla text; compared RNN, LSTM, and BiLSTM models on a labeled Bangla dataset.

[Payroll Management System](#) — PHP, Laravel, MySQL, JavaScript

- Designed and developed a payroll management application to streamline employee information and salary processing.

[Shopping Cart Web Application](#) — Node.js/Express, React, MongoDB, Bootstrap

- Built a Mern-stack e-commerce shopping cart application with separate backend and frontend, covering product listing, cart management, order flow and payment process.

[Human Activity Recognition using Federated Learning \(Thesis – In Progress\)](#) — Python, PyTorch, Flower, IMU Transformer, NumPy, Pandas

- Designing a federated learning framework for Human Activity Recognition using wearable IMU sensor data, exploring transformer-based architectures, client personalization, and communication-efficient aggregation methods.

TECHNICAL SKILLS

Languages: Python, JavaScript, PHP, SQL

Frontend: React, Redux Toolkit

Backend: Express.js, Laravel

Machine Learning: TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy

Tools & Technologies: Git, GitHub, VS Code, Postman

RESEARCH EXPERIENCE

A Systematic Review of Federated Learning for Human Activity Recognition Across Different Data Modalities

Submitted to iCONNECT 2026 · Status: Under Review
